233 Sussexvale drive, Brampton ON, CA

EDUCATION

University of Ottawa — Bachelors in Science

September 2018 - May 2022

Mathematics Major

EXPERIENCE

Alpatech Global Logistics, Toronto — intern

June 2020 - August 2020

Improved and automated email outreach flow and redesigned site.
Selenium, xlswriter and bs4 to scrape client information into excel sheets.
Pandas and O365 to read the excel sheets and send emails to clients.

Facebook Data Challenge, Remote — Finalist

April 2020 - August 2020

1 of 80 students selected from US/Canada. 4 month remote program, students paired with Facebook data scientists and engineers in groups to learn and participate in workshops.

PROJECTS

Hypemail — O365, Flask, Python

An email bot that hypes you up during your email conversations. CC the bot while server is running and it will reply with a random hype gif

Data Visualization — Matplotlib, Pandas, Numpy, Python

Analyzed datasets with 10 000 entries in order to find insights. Used data preprocessing techniques to clean and format data properly.

Web app — React, Node, Firebase

Currently creating a web app for a client. Using Firebase for auth and database. Planning on adding e signature and payment apis

Walk in clinic app — Android Studio, SQL, Course Project

Worked on the Java class that used an SQL library to run the database. Performed unit testing and debugging for the project.

SKILLS

Languages

Python

Java

JavaScript

SQL

R

Tools

Git

Jupyter Notebook

Photoshop/ Figma

Unity

Android Studio

Libraries/Frameworks

Flask

Node

React

Matplotlib

Pandas

NumPy

D3.js
